STAR App User Handbook

A practical guide to getting started and using STAR for individuals, group administrators, direct support staff, caregivers, and case managers.

Start with onboarding — then follow your role

- PART 1 | Getting started: create an account, confirm email, create or join a group, share the invitation, complete Profile, and learn navigation.
- PART 2 | Group administrators: set up the team, check caregiver assignments, manage ISA outcomes, and review information.
- PART 3 | Direct support staff and caregivers: document shifts, supports and locations; complete check-ins; use reports, messages and Moments.
- PART 4 | Case managers: verify access, prepare for reviews, review ISA progress, and coordinate follow-up.
- PART 5 | The individual and supporters: use My STAR to communicate, share preferences, and review experiences.
- PART 6 | Shared tools: How I Communicate and Understanding My Support Needs, with illustrated instructions for individuals and their teams.
- PART 7 | References, troubleshooting, and a prioritized list of screenshots still needed.

Which path should I take?

Creating a brand-new team? Follow Steps 1–3, then the Administrator section. Invite everyone else with the group code.

Joining an existing team? Follow Step 1, then Step 4, Step 6, and your own role section. Individuals have an additional illustrated setup page.

Already using STAR? Skip onboarding and go to the section for the work you are doing today.

> Important: This is a working handbook. Screens marked SCREENSHOT NEEDED are awaiting confirmation. STAR TEST and live STAR are separate environments; use the correct link and do not use real personal data in test accounts.

Table of Contents

PART 1 — GETTING STARTED

- Create and confirm your account
- Create your team group
- Share your group invitation
- Join an existing team group
- Set up the individual account
- Complete your profile

- How to navigate STAR

PART 2 — ADMINISTRATORS

- First administrator session
- Set up and maintain the team
- Manage ISA outcomes and reviews
- Weekly and monthly review

PART 3 — CAREGIVERS & DSPs

- First caregiver session
- Complete a daily check-in
- Record support provided and location
- Review reports and team tools
- Find resources and instructions

PART 4 — CASE MANAGERS

- Get access and prepare a review
- Review ISA progress and follow up

PART 5 — INDIVIDUALS / MY STAR

- Welcome and first-time setup
- Daily use: How I Feel and My Day
- Help Now and Something Hurts
- Read Aloud and microphone
- Moments, photos and communication

PART 6 — COMMUNICATION AND SUPPORT PREPARATION

- Find both tools and support participation
- How I Communicate: answers, guidance, observations and orientation
- Understanding My Support Needs: questions, concerns and linked records
- Review and export a preparation packet; save and access help

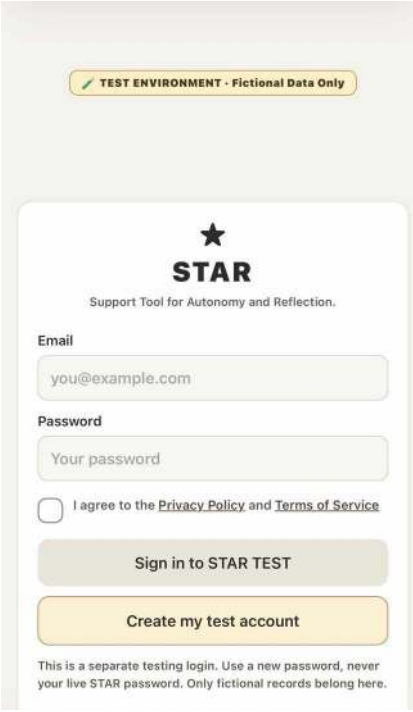

PART 7 — REFERENCE

- Resources and troubleshooting
- Screenshots still needed

DRAFT

Step 1 | Create and confirm your account

Everyone starts here. Create a login and verify the email address before choosing a role or setting up a team. The screenshots show STAR TEST; the live app has a separate sign-in system.

1. Open STAR and tap Email. Enter an address whose inbox you can open. Tap Password and enter the password you want to use.

2. Open and read the Privacy Policy and Terms of Service. Check the agreement box if you agree.

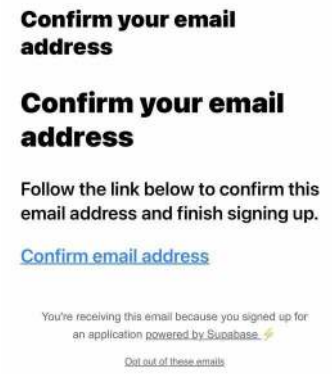

3. In STAR TEST, tap Create my test account. Use a new password for this separate testing account.

4. When STAR tells you to check your email, open that inbox. Open the confirmation email and tap Confirm email address.

5. Return to the same STAR address. Enter that email and password, check the agreement box, and tap Sign in to STAR TEST.

6. On Choose Your Role, select I am a Caregiver or I am an Individual. Continue with the instructions on the next two pages.

Confirm the email address

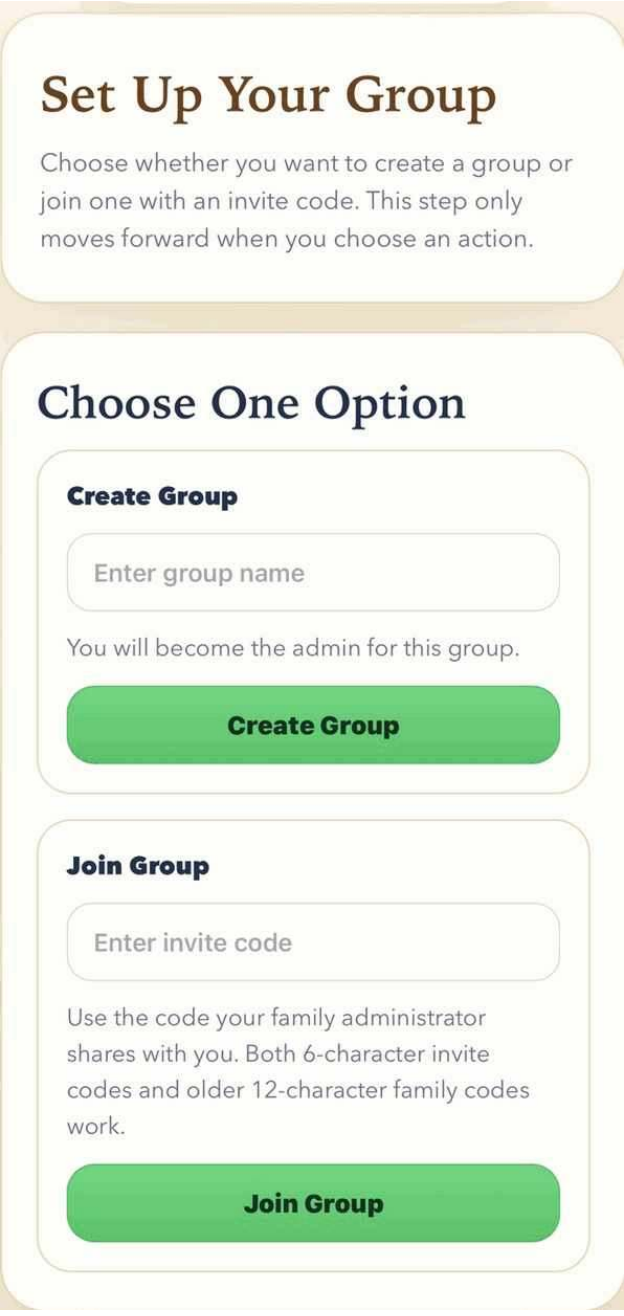

If the confirmation email is missing, check Spam or Junk and confirm the address you entered. If STAR says the account already exists, use the sign-in option.

Step 2 | Create your team group (administrator)

Only the person starting a new team group should follow this page. First create your own account and confirm your email. On Choose Your Role, tap I am a Caregiver; creating the group makes you its administrator.

Create the team group

1. On Set Up Your Group, find Create Group. Tap Enter group name and type a name the team will recognize.

2. Tap Create Group. The screen says you will become the admin for this group.

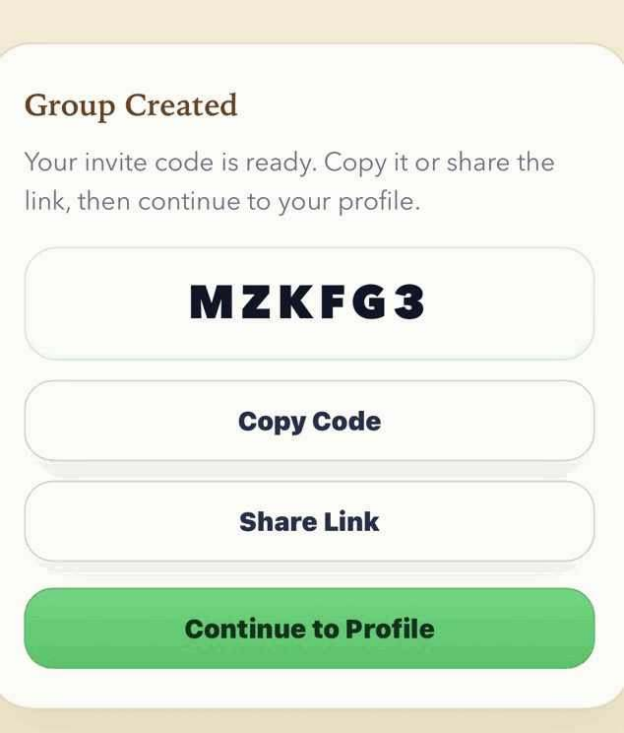

3. Under Group Created, find the invite code. Tap Copy Code and keep it ready to give to the caregivers and individual who should join.

4. Tap Continue to Profile. Follow the setup screens. On Profile, enter your own Display Name, choose the correct Default Group, review the agreement, and tap Save Profile.

5. Complete the caregiver setup screens and confirm that the correct individual and team group are shown before entering records.

What to look for on the group page

Screenshot captured from STAR UVM Testing. Joining requires an invitation code from the group administrator.

Create Group	Join Group
Enter group name	Enter invite code
Create Group	Join Group

Group page guide using the app's field and button labels. Caregivers see both options. Individuals see the Join Group option.

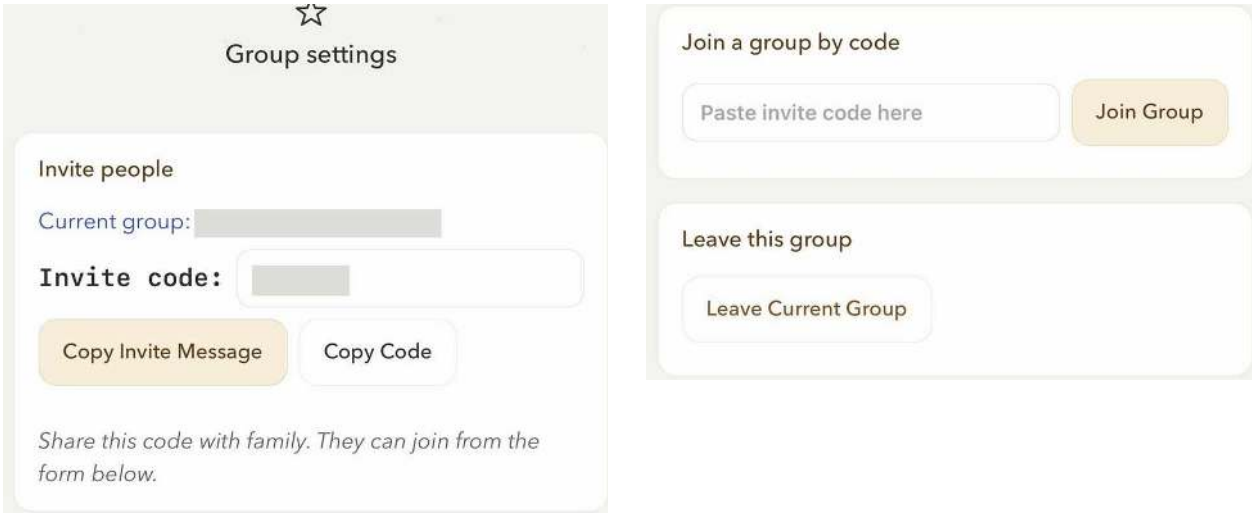

Help another caregiver join

Ask the caregiver to create and confirm their own account, choose I am a Caregiver, enter your invite code under Join Group, and tap Join Group. They then complete their own Profile. Confirm their name appears in the team before assigning their check-in questions.

Share the invite code shown by STAR. The current group page accepts 6-character invite codes and older 12-character family codes. Copy the full code into Enter invite code.

Step 3 | Share your group invitation

After creating your group, open Menu, then Settings & Admin to reach Group Settings. Confirm the correct group, then copy the invitation you will share with each team member.

1. Invite someone. If your role allows it, tap Copy Invite Message or Copy Code. Share the invitation directly with the person who should join.

2. Join a group. Under Join a group by code, paste the invite code you received and tap Join Group. Check Profile if you want to set the joined group as your default.

3. Leave a group. Use Leave Current Group only when you intend to leave the group shown in Group Settings.

SCREENSHOT TIP: This page already includes a Group Settings screenshot. If sharing controls differ in live STAR, send the current full screen.

Step 4 | Join an existing team group

A team member should join the existing group rather than create a second group. The administrator sends the invite code or invitation message first.

For a direct support professional or caregiver

1. Open the STAR link sent by the administrator. Create your own login, verify the email, and sign back in.

2. On Choose Your Role, choose I am a Caregiver. On Set Up Your Group, find Join Group rather than Create Group.

3. Paste the complete code into Enter invite code and tap Join Group. Read the group name in the confirmation.

4. Continue to Profile. Set the display name people should recognize, confirm Default Group, and tap Save Profile.

5. Open Home, check that you see the correct group and individual, then ask the admin to confirm your caregiver check-in assignment.

For an invited case manager

Ask the group administrator which login path and level of access your STAR environment supports before selecting a role. A dedicated case-manager sign-up choice has not yet been verified in the screenshots. Use the invitation provided by the administrator and confirm that the correct group and only authorized records are visible.

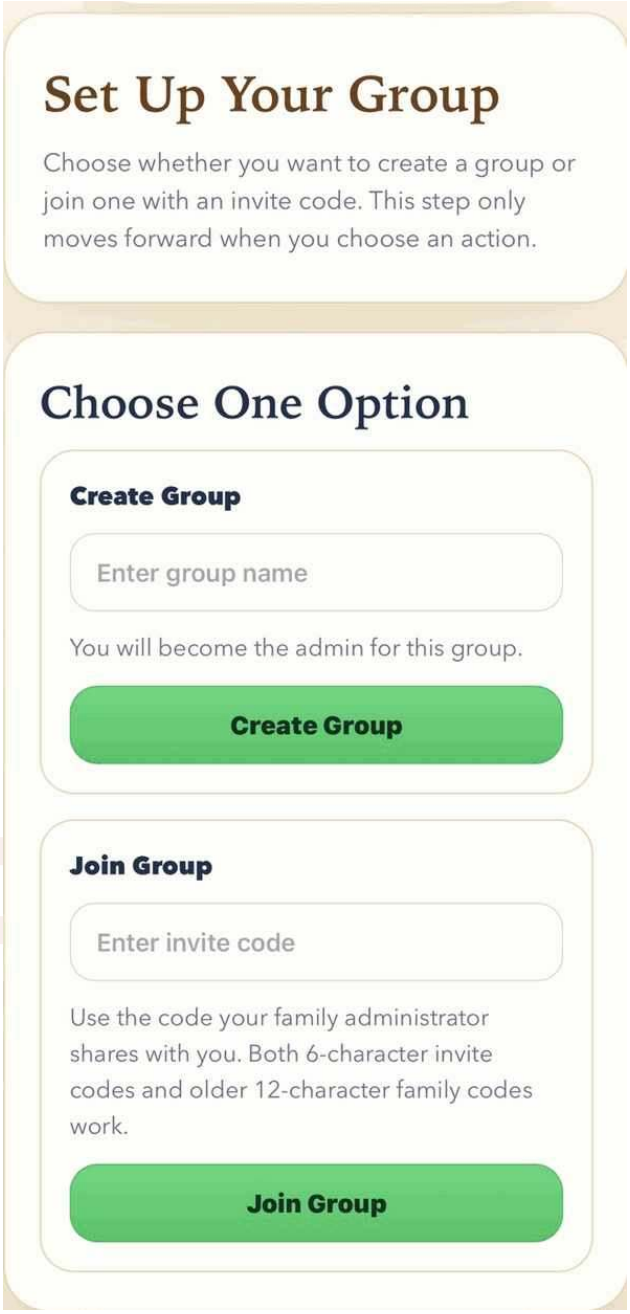

For the individual

Choose I am an Individual after creating the separate login, then use Join Group with the administrator's code. The next onboarding page gives the full individual setup procedure.

Screenshot captured from STAR UVM Testing. Joining requires an invitation code from the group administrator.

DRAFT

Screenshot captured from STAR UVM Testing. Joining requires an invitation code from the group administrator.

Step 5 | Set up the individual account

An individual uses a separate login and joins the existing group with its invite code. A support person may help, while respecting the individual's choices about name, picture, and whether to use My STAR.

Create the individual login

1. Have the team's invite code ready. Use an email address available for the individual's separate account and make sure the individual or person helping can open that inbox.

2. Open STAR in a separate browser profile or sign out of the admin account. Follow Create and confirm your account. Enter the email and password intended for the individual's login.

3. Open the confirmation email, tap Confirm email address, return to STAR, and sign in with the individual's account.

4. On Choose Your Role, tap I am an Individual.

5. On Set Up Your Group, tap Enter invite code under Join Group. Paste or type the code the admin copied. Tap Join Group.

6. Check the group name in the success message. On Profile, replace any email address in Display Name with the person's preferred name. Check Default Group, add a picture if desired, review the agreement, and tap Save Profile.

7. Check that My STAR opens for the correct person and group. Show the person How I Feel, My Day, and Back to My STAR. Offer time to explore and let them stop or skip.

If an extra email address is unavailable

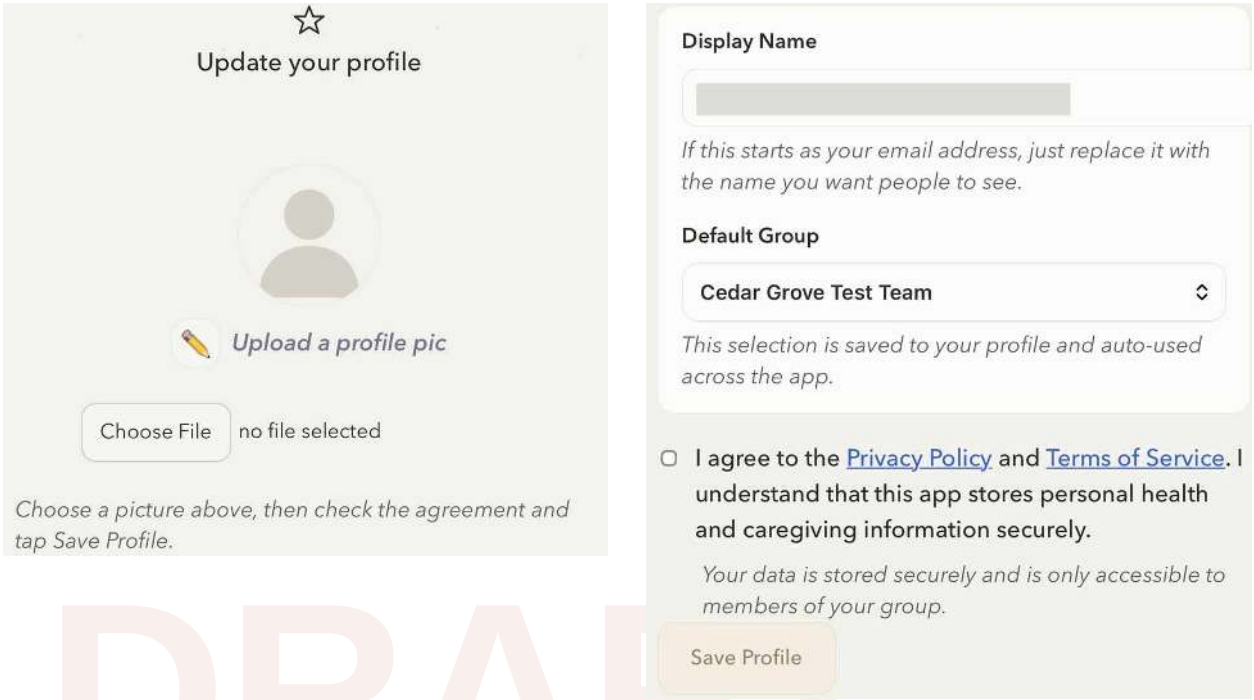

A separate login needs an email address available for that account and access to its confirmation email. Arrange that address before starting the individual's sign-up. The individual profile and the login used to open My STAR both need to refer to the same person.

If joining does not work

Ask the admin to copy the invite code again and check that both people are using the same STAR environment. Paste the complete code into Enter invite code and tap Join Group. If the wrong name or group appears, ask the admin to check the account and individual connection before saving personal entries.

Step 6 | Complete your profile

Open Menu, then Profile. Your display name is the name other people see. Default Group tells STAR which group to use across the app.

DRAFT

1. Choose a picture. Under Upload a profile pic, tap Choose File and select a picture if you want to add or change it.

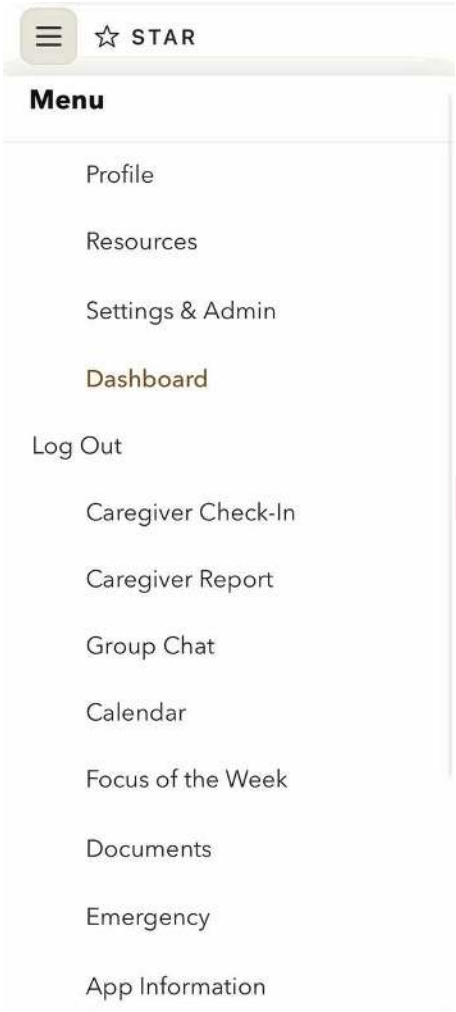

2. Check your name and group. Enter your preferred Display Name. If you belong to more than one group, choose the one you want STAR to open by default.

3. Review and save. Read the Privacy Policy and Terms of Service, check the agreement if you agree, then tap Save Profile.

How to navigate STAR

On the caregiver and admin side, use the bottom bar for everyday tools. Tap the three-line button at the upper left to open the full Menu.

1. **Home** Return to the dashboard and Quick Actions.
2. **Check-in** Record how the individual's day went.
3. **Reports** Review check-in summaries and trends.
4. **Calendar** See scheduled group events.
5. **Focus** Open Focus of the Week.
6. **Docs** Find documents and the Resources card.
7. **Chat** Open Group Chat for your active group.

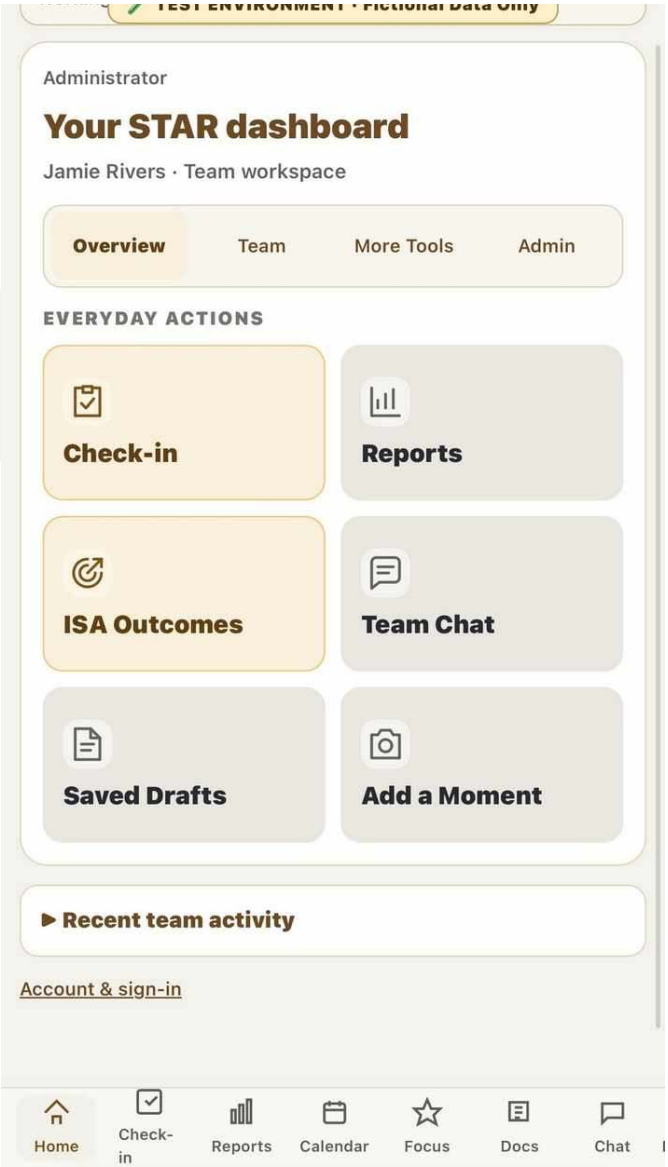

Use the full Menu for Profile, Resources, Settings & Admin, Emergency, App Information, and Log Out. Scroll inside the menu to see more links. Dashboard is the menu name for Home.

Caregiver & admin dashboard

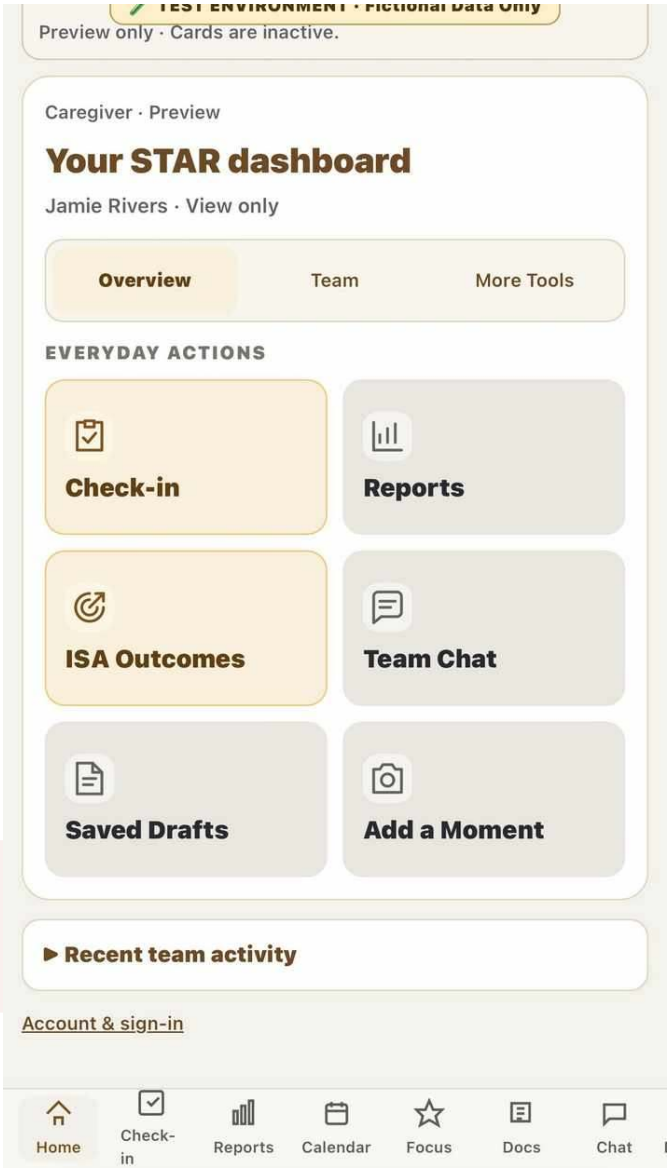

Tap Home on the bottom bar or Dashboard in the menu. Choose a tile under Everyday Actions, or use Overview, Team, More Tools, and (for administrators) Admin to find more features. The compact two-column layout reduces scrolling.

Updated dashboards — administrator and caregiver (November 2026)

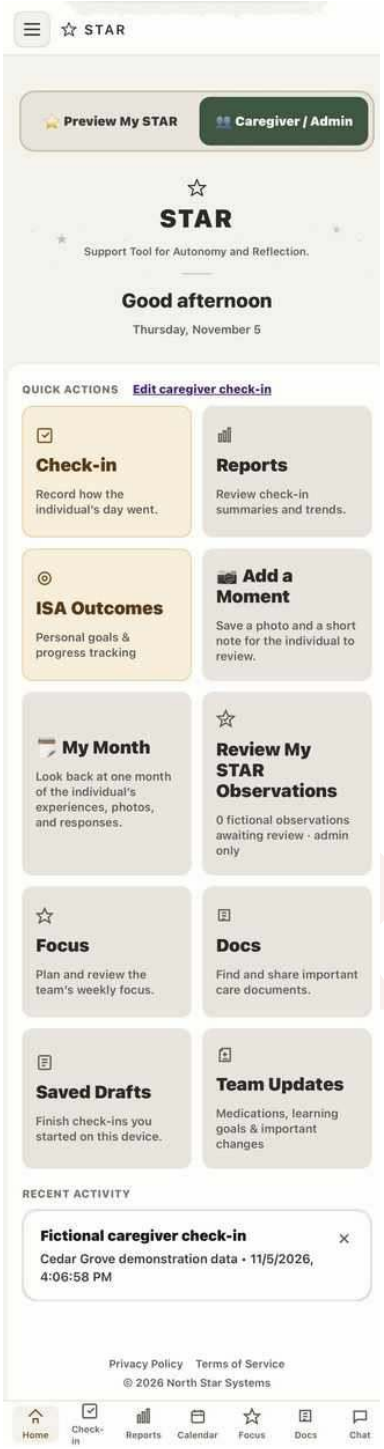

The Home dashboard now uses two columns of compact action tiles to reduce scrolling. Select Overview for everyday actions, Team for team information, and More Tools for additional features. Administrators also have an Admin tab. The caregiver role preview shows fewer tabs. In the testing environment, role preview cards are inactive; to use features, return to your signed-in role. Tap an action tile to open its tool when using your actual account.

Administrator dashboard — Overview and everyday actions

Caregiver preview — same compact dashboard, without administrator-only controls

App screenshots joined from top to bottom.

Quick Actions

Check-in and Reports Record how the individual's day went, then use Reports to review entries over time.

ISA Outcomes Open the individual's outcome cards to see goals and how progress is tracked.

Add a Moment and My Month Save a photo and short note for the individual to review, or look back at a month of experiences.

Focus and Docs Open the team's weekly focus or find care documents.

Saved Drafts Return to a check-in you started on this device.

Admin tools Use Edit caregiver check-in beside Quick Actions to assign questions. Open Review My STAR Observations for submissions awaiting review or Team Updates to record important changes.

Recent Activity Scroll below Quick Actions to see recent entries when available.

Bottom navigation Use the bar to return Home or open another main tool. See How to navigate STAR for the numbered reference.
